October 1, 1964

Hillsboro, Ore.

Dear sir,

An unidentified flying object heading southeast from northwest was seen at 625 a.m. this day October 1, 1964. My father and I were on our way from our barn identifying various stars in the clear morning sky when we observed this flying object which appeared to be at an altitude of at least 20,000 feet and at an angle of  $50^\circ$ . The speed appeared to be at least <sup>twice</sup> that of an F-104 jet.
